

COMPANY DIRECT PROGRAM

providing high-quality, cost-effective orthopaedic care

OVERVIEW

The **COMPANY DIRECT PROGRAM** with OSS Health is an innovative healthcare service providing a high-quality, cost effective solution for employees and employers. The program offers set rates per visit and bundled package rates based on expected costs for clinically-defined periods of orthopaedic care.

The **PATIENT NAVIGATOR** at OSS Health manages everything related to the care period— from selecting a physician and scheduling appointments to gathering medical records to coordinating logistics and follow-up. Not only does this streamline the various tasks and paperwork, it reduces unnecessary stress for the patient and ensures appropriate post-surgical care. It can also shorten the timeline for appointments and surgery through coordinated care.

In essence, the **COMPANY DIRECT PROGRAM** covers patient care costs from start to finish, and expedites, tracks and simplifies the process along the way.

BENEFITS

- **HIGH QUALITY HEALTHCARE CONTINUUM** — talented, specialized physicians committed to your orthopaedic needs
- **COST-EFFECTIVE** — savings from limited to no out-of-pocket expense for employees, and one single-source of billing
- **PATIENT NAVIGATOR** — expedites the scheduling and treatment process for a no-hassle experience

OSS HEALTH LOCATIONS

My doctor wants me to go somewhere else for my imaging study, do I have a choice?

YES! You always have a choice when it comes to where you want to go for your imaging studies. Tell your doctor you want to go to Susquehanna Valley Diagnostic Imaging (SVDI) located at 6850 Lows Rd., Bloomsburg Pa 17815 for your MRI, Cat Scan, Ultrasound, Mammo, DEXA or Xray needs.

Why can a hospital cost me more for the same study?

Services cost less at SVDI because we specialize in outpatient only. Outpatient imaging centers have less overhead than a hospital and are more cost effective. You receive one bill no hidden charges.

Do all outpatient imaging centers cost the same?

NO! Some outpatient imaging centers are affiliated with hospitals so the cost of their exams can be the same as what you would pay at the hospital. SVDI is an independently owned and operated outpatient imaging center.

I have insurance. Can SVDI still cost me less than the hospital?

YES! The rate your insurer allows a hospital to collect for an exam can be significantly different than the rate

your insurance sets with an outpatient imaging center like SVDI for the same exam. Since high deductibles & coinsurances are becoming more common it is important you understand what your insurance company will cover & what is your responsibility. For example if you have a 20% coinsurance : MRI at a hospital:\$5000.00 you are responsible for \$1000.00

Same MRI at SVDI:\$500.00 you are responsible for \$100.00

You would SAVE **\$900!!!** For the same study If you have a high deductible with your insurance you will be responsible for a significant amount more if you go to a hospital, your savings can be 10X more at SVDI.

I have a very busy schedule. Do you have convenient hours?

YES! Our hours are Monday-Friday 8:00am-5:00 pm. Earlier and later hours are available by request. On call technologist always available. At SVDI there is no central scheduling, when you call we can get you in the same day for your appointment.

How long will I wait before receiving the results of my exam? Your doctor will receive the results of your exam the same day. If you get your exam at the hospital it can take days or even weeks to get the results.
